SUMMARY

Driven Full Stack Developer with a background in IT Business Analyst, customer service and a Full-Stack Certificate from the University of Rice - Houston. During the intensive boot camp, I worked on multiple group projects honing skills in Node.js, Express, Handlebars, MySQL, MongoDB, JavaScript, React, CSS, and HTML. I recently collaborated with a team of 3 to build an application from start to finish and was able to demo it to a group of industry professionals with positive reviews. I enjoy collaborating and working on a diverse team while solving problems in high-stress environments. An articulate individual who enjoys connecting with co-workers and is passionate about building applications that assist everyday people to make their lives easier. Looking to bring my knowledge, communication, and technical skills to add value to an organization while focusing on continuous learning and engaging in my community to give back in the field of web development.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, SQL
Key Skills: SQL Databases, Bootstrap, Foundation, jQuery, Node JS
Web Development Stacks: MERN

RELEVANT EXPERIENCE

Systems Support Analyst   *2011* – Current
City of Houston   **Houston**, Texas
I'm responsible for bridging the gap between IT and the business using data analytics to help business leaders make sound decisions based on data. I have to keep constant oral and written communications between IT and business stake holders of recommendations. I'm able to put my detailed oriented, analytical thinking and problem-solving skills to analyze data and business processes for improvements.
Key Accomplishments:
- Successfully implemented new INFOR system to collect $125 million annual drainage fee
- Successfully migrated billing system from Mainframe to .NET

ADDITIONAL EXPERIENCE

Customer Service Representative   *2004* – 2011
City of Houston   **Houston**, Texas
I was responsible for providing excellent customer service both over the phone and in person. I analyzed many customer accounts and use business requirements to determine best course of action to adjust customer accounts to met business requirements and provide excellent customer service.

PROJECTS

Themed Sudoku | https://code-monkey713.github.io/theme-sudoku/
- Sudoku game using API calls for random generated board and Giphy API themed gifs
- I was responsible for leading the team and providing most of the frontend design work
- Foundation framework was used with API calls for themed gifs from end user select

Weather App | https://code-monkey713.github.io/weather-side/
- Weather app using Openweather API with 5-day forecast search by city name or zip code
- Built with user in mind to get the weather for your favorite cities
- Application was built using JavaScript, jQuery, and openweathermap API

Day Planner | https://code-monkey713.github.io/day-planner/
- This is the day planner app with the daily calendar app to record your events for each hour of the day
- The app was built to help me kept up with my busy daily schedules
- JavaScript, jQuery, and MomentJS
